Technical Skills

- Languages

Java, Python, Kotlin, C++, JS, PHP, HTML/CSS

- Frameworks/Tech

MERN Stack, MVC, Android SDK

- Design & Tools

Figma, Git, VS Code, JetBrains

- Databases

MySQL, MongoDB

Language

Sinhala

English

About Me

Detail-oriented IT undergraduate proficient in MERN stack, Java, and Kotlin with hands-on experience in full-stack web and mobile development. Seeking an internship to deliver user-centric, high-quality code in Web, Mobile, or QA Engineering roles.

Education

- BSc (Hons) in Information Technology, specializing in Information Technology at SLIIT

(2023 - Present)

Year 1 GPA - 2.9

- Intent for Web Technologies (PROJECT) -A
- Object-Oriented Concept (Project)—A
- Introduction to Programming (C language)—B
- Introduction to Computer System - B
- English for Academic Purposes-B

Year 2 GPA - 2.7

- Object-Oriented Programming (JAVA Project) - A
- Computer Network - B
- IT Project - A
- Probability & Statistics - B-
- ESD - A

- English & IT Diploma in ICBT Campus - Kandy (2022)
- GCE A/L Bio Systems Technology - St. Joseph's Balika MV - Kegalle (2022)
- GCE O/L St. Joseph's Balika MV - Kegalle (2018)

Projects

e-Commerce Web application

Aura Gem Handcraft jewelry—https://github.com/chathu-02/e-commerce-website.git

- Developed a full-stack e-commerce platform specifically for a jewelry business using React.js, Node.js, Express.js, and MongoDB.
- Designed a user-friendly and elegant interface using Figma and implemented it with Tailwind CSS for a premium look and feel.
- Building an Admin Dashboard to manage product listings (CRUD operations), track orders, and view customer insights.
- Implemented secure user authentication and a responsive shopping cart experience.
- Utilized Git for version control and maintained a clean, organized codebase on GitHub.

Salon Management System - https://github.com/chathu-02/Salon-Management-System

- Designed and developed a full-stack web application to automate salon bookings and service management.
- Implemented secure user authentication and a real-time booking dashboard using React.js and Node.js.

Personal Task Manager - https://github.com/chathu-02/Personal-WellnessApp

- Developed a native Android application using Kotlin to streamline daily task management.
- Focused on providing a seamless user experience with a clean, intuitive UI built in Android Studio.

TunKart - Online Music Store -https://github.com/chathu-02/Online-Music-Store

- Built a scalable music platform using Java and MySQL, adhering strictly to the MVC architecture

Air ticket booking POS System

- Using Java to manage airline seat reservations and point-of-sale operations.

Recruitment-of-Company-System - https://github.com/chathu-02/Recruitment-System

- Built a dynamic website to connect job seekers with employers using HTML, CSS, JS, PHP, and MySQL.
